

SMM SAMMITR

SAMMITR

Trucktops designed to be tough

**MADE IN
STEEL**

Sammitr Steel Trucktops

Sammitr is the only company in the world to manufacture pressed steel canopies for pick-up trucks. These are produced from 0.8mm galvanized sheet steel with EDP anti-rust treatment and finished using colour matched baked paint technologies employed by the worlds leading car manufacturers.

The end result is a truck top that's as tough as your pickup and built from the same materials! Our canopies are known for their strength, durability, safety, style and environmental friendliness. The Sammitr hardtop is chosen by many of Europe's pickup manufacturers as their OE truck top.

Built to resist the elements
